OBSERVATIONS ON ANEURISM: OF THE ABDOMINAL AORTA (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Observations on Aneurism: Of the Abdominal Aorta Notwithstanding the little reliance which M. Fodere, and a few others, place in the knowledge which may be gained from the dissection of morbid bodies, I am disposed to think that most medical men entertain a different opinion, and concur with Dr Sandifort, who has remarked, *Et quis denique vel ipsius Hippocratis aurea scripta attento volvens animo, non animadvertit saepius summum hunc naturae observatorem, longe plures sanaturum fuisse morbos, si cultri ope illorum inquirere causas ipse fuisset concessum. Revera enim in permultis casibus, causa morbi inventa, inventam etiam esse sanationem, et plurimos ab hostili morborum insultu esse liberatos.* The importance of the study of morbid anatomy, to the accurate knowledge of physic and surgery, must be obvious even to the cursory and inexperienced inquirer. It may indeed be represented as one of the primary foundations of medical science, for, without an intimate acquaintance with the morbid changes that take place in the human frame, as the causes or the effects of disease, the practice of physic and surgery can be directed only by ill-founded hypotheses, or blind empiricism.
